## What is ProjectSend?

A cloud-based multimedia sharing file system. Created for artists, DJs, producers, promoters, and anyone in general, really, to store and download their artistic works when needed most.

Our secure file management system delivers you peace of mind when you're in a rush or a bind. Let's face it, it happens to the best of us. With a hundred things on our minds and trying to multitask, we are guilty of just leaving for an event, getting there, and oh damn, I forgot my USB drive with my songs, or trying to find it on our phone, hoping it's there!

With the PainMuzik ProjectSend system integrated into our studio, we can easily upload draft takes, progress with your song, and work on mixing development, your masters, zip files, images, document files, videos, and DAW projects that are accepted, among other things.

You can upload your files and store them in your own account, download them from the cloud, make them public, send a share download link to whomever, with or without an expiration date, and download multiple files as a zip file.

Get notified instantly when we upload your song, mix drafts, and final master, and anything else that is part of your session project!

Since our ProjectSend file-sharing system is cloud-based, you can easily access your files on the one thing you cannot be without, and that goes everywhere with you, that's your mobile phone! Simply log in to our website <https://www.painmuzik.net> and receive or download what you need.

Introductory yearly subscription price \$139.95 - Pay over time in 4 easy installments with *Afterpay* at checkout!! [\[BUY HERE\]](#)
